## CONNECT THE BABY MONITOR

## CONNECT THE BABY MONITOR (CONT'D)

### Charge the parent unit battery

When you have connected and turned on the parent unit, the battery charges automatically NOTES

- Before using the baby monitor for the first time, charge the parent unit battery for 12 hours. When the parent unit battery is fully charged, the battery icon becomes solid 💷 .
- It takes longer to charge the battery when the parent unit is turned on. To shorten the charging time, turn the parent unit off while charging.
- The standby time varies depending on the sensitivity level you set, your actual use and the age of the battery.

The battery icon indicates the battery status (see the following table).

BATTERY INDICATORS	BATTERY STATUS	Αςτιον
The screen displays 🛄. The 💷 light flashes.	The battery has very little power and may only be used for a short time.	Charge without interruption (about 30 minutes).
The battery icon becomes solid 🛄 .	The battery is fully charged.	To keep the battery charged, connect it to AC power when not in use.

## <sup>Q</sup><sub>∞∆</sub> Frequently asked questions

Why does the	Try the following (in the order listed) for a common cure:
baby monitor	1. Disconnect the power to the baby units and the parent unit.
ot respond	2. Wait a few seconds before connecting power back to the baby units and the parent unit.
ormally?	3. Turn on the baby units and the parent unit.
	4. Wait for the parent unit to synchronize with the baby units. Allow up to one minute for this to take place.
Why doesn't the baby unit and parent unit power-on light illuminate when the units are switched on?	Perhaps the parent unit is not connected to power. Insert the appliance plug into the parent unit and insert the adaptor in a wall socket. Then, <u>press and hold</u> <b>POWER</b> to switch on the parent unit and to establish connection with the baby unit.
	Perhaps the baby unit is not connected to power. Insert the appliance plug into the baby unit and insert the adaptor in a wall socket. Then, slide the <b>UON/OFF</b> switch to <b>ON</b> to switch on the baby unit and to establish connection with the parent unit.
Why doesn't my parent	Make sure the power is not controlled by an electronic wall switch.
unit charge while connected to AC power?	You may have used the battery for a long time. See <b>Warranty</b> for repair/replacement.
Why is my screen in black and white?	The screen is in black and white during night-time or in a dark room when the night vision feature is activated. This is normal.
Why do I get glare or olurry display on my creen when viewing my oaby at night?	During night-time or in a dark room, the surrounding and other interfering factors, like lighting, objects, colors and backgrounds may affect the image quality on your parent unit screen. Adjust the baby unit's angle or place the baby unit at a higher elevation to prevent glare and blurry displays.
Why does the baby nonitor produce eedback?	<ul> <li>The parent unit and baby units may be too close to each other.</li> <li>Move the parent unit away from the baby units until the noise stops; OR</li> <li>Turn down the volume of your parent unit.</li> </ul>
Why does the parent unit beep?	The baby unit may be out of range. Move the parent unit closer to the baby unit (but not less than 1 metre).
	The parent unit may not have enough battery for the parent unit to perform normally. Charge the battery in the parent unit until the battery icon becomes solid IIII.
	The temperature of your baby's room may be too high or too low.
Why does the parent unit react too quickly to other sounds?	The baby unit also picks up other sounds than those of your baby. Adjust the VOX sensitivity level to a lower level or lower the parent unit speaker volume. See <b>Adjust the sound sensitivity of the baby unit</b> .
Why don't I hear a sound/Why can't I hear	The parent unit speaker volume may be too low. See <b>Adjust parent unit speaker volume</b> to increase the volume.
ny baby cry?	You may have set a low VOX sensitivity level. See <b>Adjust the sound sensitivity of the baby unit</b> to set to a higher level.
Why can't I establish a connection? Why is the connection lost every now and then? Why are there sound interruptions?	The baby units may be out of range. Move the parent unit closer to the baby units (but not less than 1 metre).
	Other electronic products and wireless products may cause interference with your baby monitor. Try installing your baby monitor as far away from these devices as possible.

- VTech Electronics Europe Plc, c/o XPO Logistics, Warehouse 350, Cat & Fiddle Lane, West Hallam, DE7 6HE THIS WARRANTY IS OFFERED AS AN EXTRA BENEFIT AND DOES NOT AFFECT
- CONSUMERS' STATUTORY RIGHTS

This warranty is valid for the UK and Eire only. For products purchased outside UK and Eire, please contact your local distributor or place of purchase

### IMPORTANT

Please retain this booklet with your sales receipt as proof of the date of purchase.

### Customer Service

Please call our Consumer Services Department on 03306 780149 (from UK) or +44 3306 780149 (outside UK) and a service representative will be happy to help you.

Importer: VTech Electronics Europe Plc. Napier Court, Abingdon Science Park, Abingdon, Oxon, OX14 3YT.

You can choose to hear sounds from the baby unit all the time, or to only hear sounds that exceed a certain level. Use the parent unit to adjust the baby unit's microphone sensitivity. The higher the sensitivity level, the more sensitive the baby unit will be in detecting sounds that transmit to the parent unit. The VOX sensitivity level is preset to the highest level.

## Sound sensitivity and sound activation

### Adjust the sound sensitivity of the baby unit

τινιτγ	Highest	High	Medium	Low	Lowest
RIPTION	The parent unit speaker is constantly on, and you will hear all sounds (including background noises) from your baby's room.	The parent unit speaker turns on for soft babbling and louder sounds from your baby. It remains quiet when your baby sleeps soundly.	The parent unit speaker turns on for loud babbling and louder sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for crying and louder sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for loud crying or screeching sounds from your baby. It remains quiet when your baby makes soft sounds.

### Sound activated screen

With sound activation turned on, the parent unit screen stays off to save power when the baby unit detects no sound. Once the baby unit detects sounds that are louder than the chosen sound sensitivity level, the parent unit screen turns on automatically. It will then turn off again after 50 seconds of no sound detection.

The Heart Beat sound file was created by Zarabadeu, and is used under the Creative Commons license.

Manufacturer: VTech Telecommunications Ltd. 23/F., Tai Ping Industrial Centre, Block 1, 57 Ting Kok Road, Tai Po, Hong Kong.

### NOTE

• While the screen is turned off, any keypress or alert message will trigger the screen to return to the preset brightness level. After 10 minutes of inactivity, it will resume to dim mode.

## NIGHT VISION

The baby unit has infrared LEDs that allow you to see your baby clearly at night or in a dark room. When the baby unit being viewed detects low light levels, the infrared LEDs are switched on automatically. The images from the baby unit are in black and white, and 🥝 appears on the screen.

2

-OR-

### 🖹 Notes

- It is normal to see a short white glare on your parent unit screen as the baby unit is adapting to the dark environment.
- When the infrared LEDs are on, it is normal for the images to be in black and white.

### 尝TIP

at a higher elevation to prevent glare and a blurry display.

• Depending on the surrounding and other interfering factors, like lighting, objects, colours and backgrounds, the display resolution may vary. Adjust the baby unit angle or place the baby unit

## GENERAL PRODUCT CARE

- To keep this product working well and looking good, follow these guidelines:
- Avoid placing it near heating appliances and devices that generate electrical noise (for example, motors or fluorescent lamps).
- DO NOT expose it to direct sunlight or moisture.
- Avoid dropping the product or treating it roughly.
- · Clean with a soft damp cloth.

UK

CA

- DO NOT immerse the parent unit and the baby unit in water and do not clean them under running water.
- DO NOT use cleaning spray or liquid cleaners.
- Make sure the baby unit and parent unit are dry before you connect them to the mains again.

## **STORAGE**

When you are not going to use the baby monitor for some time, store the parent unit, the baby unit and the adaptors in a cool and dry place.

### ADULT SUPERVISION

- This baby monitor should be for use by adults only.
- Do not place the baby unit inside the cot or playpen.
- For children's safety, touching and playing with the baby monitor and all the accessories are not recommended. THIS IS NOT A TOY.

## A MOUNT THE BABY UNIT ON DRY WALL (OPTIONAL)
